Farm for the Future

AGRONOMIC FOR
COMMUNITY EMPOWERMENT

Weekly News 03/2024.

Jan. 15th 2024.

Yara Knowledge Center at the FFF farm.

Our commercial partner Yara Tanzania Ltd has established knowledge sharing platforms called Yara Knowledge Centers across Tanzania. From the very beginning, FFF has operated under the slogan *"Commercial farming and training in the same arena."*

This led FFF, Yara Tanzania Ltd, and Seed-Co Tanzania to collaborate on the establishment of the Yara Knowledge Center at the FFF farm. This innovative space serves as a hands-on learning platform for farmers to witness and adopt good farming practices, access farming knowledge, resources and technical support. This will enable them to become more profitable and sustainable, leading to better livelihoods for Tanzanians.

Today we are thrilled to say that we have officially started planting on the Yara Knowledge Center at the entry corner of the FFF farm. Using a precision planter, we have planted 5 different varieties of Seed-Co maize. Exhibiting, short, medium and long term varieties. In February we will also plant potatoes to demonstrate the opportunities available in potato farming.

(Disking and maize planting at the Yara Knowledge Center located at the FFF farm)

The Knowledge Center also has a horticulture section placed at the FFF HQ, where the 2 acres have been facilitated with drip irrigation. Tomato, sweet pepper and onions will be by far the dominating crops, however other horticultural crops will be demonstrated as well.

Join Us on this Journey:

As we are finalizing the establishment of this unique project, we look forward to inviting all farmers, young learners, and community members alike to join us at the Yara Knowledge Center. To witness firsthand how innovative techniques can revolutionize farming practices and explore a world where sustainability and productivity go hand in hand.

Dates of the opening events will be given. Connect with us online for upcoming events, workshops, and resources designed to equip you with valuable knowledge for your farming journey.

Together, let's sow the seeds of progress!

FFF Visitors Corner

On the 'who visited us corner' this week we had the pleasure of having Senior Agronomist of Yara Tanzania Mr. Mkima and the Specialist of Animal Nutrition from Yara, Dr. Abednego. Who came to see the opportunities to support the Nutrition of the animals at the Children's farm.

Inspiring Future Farmers:

We firmly believe that nurturing an interest in agriculture starts with our children. As part of our ongoing commitment, we recently welcomed a group of 27 enthusiastic children from a compassion center under KLPT (Pentecostal Church) to visit our dedicated Children's Farm.

These children were thrilled to see how farming can be modern, simplified and easy yet bring good productivity. The best part of these sessions are when we round up after the session and we get to hear how the children have changed their views towards farming. From it being farming is hard and so it is for the failures who have no other options to farming is easy and it is one of the best economic activities for them to pursue as a career.

Farm For the Future & Agronomic for Community Empowerment

"A unique model to end poverty with Commercial farming and Community Empowerment on the same arena"
