Education and Hands-On Experience in Seed Maize Production

We are thrilled to share with you the exciting educational activities that took place recently at our farm. About 350 Students from Lordshill Secondary School and 50 Mt.Maria Goretti Agriculture Training Institute had the incredible opportunity to visit our farm and gain firsthand knowledge about seed maize production.

The students engaged in a practical demonstration on detasseling, a crucial process in seed maize production. Under the guidance of our experienced Farm Manager, SeedCO Seed Inspector, and the whole FFF team they received comprehensive training on the techniques required for successful detasseling. This hands-on experience provided them with valuable insights into the intricate processes involved in producing high-quality seed maize.

Our Farm Manager and SeedCO Seed Inspector played a pivotal role in providing expert guidance throughout the training process. Their wealth of knowledge and expertise ensured that every student received thorough training, enabling them to develop essential skills in seed maize production.

It was an enriching experience as students from both institutions came together to participate in the detasseling operation. This collaboration of secondary students, college students and agriculture experts, not only fostered teamwork but also allowed them to learn from each other's perspectives and experiences. The synergy created by this exchange of knowledge was truly remarkable.

We extend our heartfelt gratitude to Lordshill Secondary School and Mt.Maria Goretti Agriculture Training Institute for choosing our farm as an educational platform for their students' growth.

We are always eager to collaborate with educational institutions and promote agricultural learning initiatives.

Investing in Future Agriculturists:

Insightful moment for 43 students from St. Felix Primary school and their 4 teachers after a day spent at the Children's farm. At FFF Farm, we firmly believe in nurturing young talent inclusively and fostering a love for agriculture among future generations. By providing these educational opportunities, we aim to inspire students to pursue careers in agriculture and contribute meaningfully to the agricultural sector.
