Harvesting of Sugar Beans

The harvesting of our bean crop is now complete. We successfully planted 63 hectares of sugar beans with two different varieties, the Uyole rosecoco and the Uyole yellow beans variety and the yield has been incredibly promising. Much thanks to our dedicated team and the community around us for their hard work. Cleaning of the sugar beans is still ongoing.

Maize seed Harvesting

As we have successfully finished harvesting our two crops, potatoes and sugar beans, we are now turning our attention to the harvesting of our seed maize. Our crops are thriving, and we are confident that this endeavor will be just as successful as the bean and potatoes crops harvest. Maize

seed is our main crop. Starting the harvesting of maize seeds means an abundant availability of jobs for the good number of local people from our community for the coming 4 months.
