## Sowing the Seeds of 2025: Week 5 in Full Swing.

The year 2025 is well underway, and here we are in its fifth week, right in the middle of planting season. The air is alive with activity and a rhythm that has become second nature to us.

During this time, the moment you step into our farm, you'll hear familiar phrases like *"We need 25 kg of female and 10 kg of male,"* or *"Marko has the planter and Joshua has the ripper."* Sometimes, Wilson's voice carries over with updates like, *"Team A is doing top dressing, and Team B is roguing."*

**Photo:** *The FFF supervisors on field inspection.*

This is the season of sowing, placing seeds in the ground, nurturing them, and envisioning the abundant harvest they'll bring in the second half of the year.

While the rains are slightly delayed compared to last year, we're working diligently to synchronize our efforts with the weather. Here's to a successful planting season and a fruitful 2025.

*Last week, our Agronomists and the Seed Co team visited the demo plots located within our 16 villages.*
