

CHILDREN'S FARM FOR THE FUTURE PROGRAM

WHAT

A program that offers a chance for children to connect with real-life agricultural experiences designed to ultimately nurture their interest in agriculture.

WHY

- To awaken the children's interest and grow their knowledge in agriculture.
- Communities perceive agriculture as the last resort after failing school.
- Modern agriculture is the best and most rewarding livelihood like the rest of occupations.

HOW

- Building a children's farm at FFF with a barn for animals (Norwegian milking goats, chicken, guinea pigs, rabbits, ducks etc.) a kitchen for practicing food and nutrition, a home garden and a greenhouse.
- Introduction and enhancement of Nutrition clubs and School gardens.
- Agriculture knowledge sharing and practical orientation at an early stage of school life.
- Kindergartens and primary schools receive training and practical farm visits twice a year as part of their school programs.
- Training children on food production, preparation and consumption.
- Facilitate children's weekend visit to the farm with their parents or caregivers.

WANTED RESULTS

- Children should value agriculture and take it more seriously like any other profession.
- Children as future ambassadors for modern and Good agricultural practices (GAP).
- A better nutritional status for schoolchildren.
